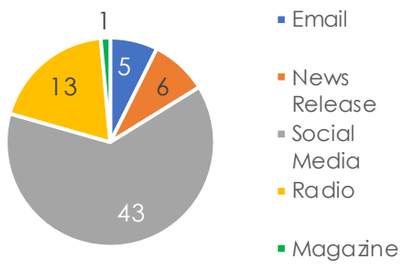
Communications



Missouri's Feral Hog Elimination Partnership set up the first Incident Command Structure in 2020 for a unified increased removal effort. The Summer Operation started in June and is ongoing. To date the parntership has removed 12,635 hogs from the land. The counties with most hogs removed were Iron with 2,204 hogs, Reynolds with 2,035 hogs, and Wayne with 1,803 hogs. During this effort 1,544,955 acres were scouted for feral hog damage. The counties with the most acres scouted were Reynolds with 233,677 acres, Iron with 225,528 acres, and Shannon with 139,219 acres.

*Not all removed reports had age or sex data available

This report is produced by the Missouri Feral Hog Elimination Partnership.
